Experience

Brightchamps

Oct 2022 – Present

Software Development Engineer (Frontend)

Bangalore, India

- Led the development of a student dashboard for seamless class management, progress tracking, and quiz assignment submission.
- Focused on optimizing the student dashboard's performance by minimizing page load times and enhancing its capacity to handle high volumes of traffic, ensuring a seamless user experience.
- Designed and implemented a user-friendly chatbot in the student dashboard, resulting in an enhanced user experience and a notable **30% reduction** in operational costs.
- Revolutionized the scheduling process for educators by creating an npm package that offers a comprehensive solution for managing availability and leave requests.
- Developed our own quiz platform and a user-friendly CRM system to streamline quiz management for educators while achieving substantial cost savings by eliminating the previous monthly expense of \$83 for Typeform.

YUDIZ

Jan 2021 – Sep 2022

Software Development Engineer (Frontend)

Ahmedabad, India

- Developed and maintained a fantasy sports application using React and React Native within a mono-repo environment.
- Played a pivotal role in scaling the application to accommodate rapid user growth while maintaining top-notch performance and stability.
- Collaborated with product managers to gather requirements and translate them into technical solutions, ensuring alignment with business goals.

Microsoft

Jan 2020 – Dec 2021

Microsoft Learn Student Ambassador (BETA)

- Part of an outstanding global community of like-minded people from all over the world. Done many collaborations, organized various events, and had a wide network of people.

Education

A.D. PATEL INSTITUTE OF TECHNOLOGY (ADIT)

Aug 2017 - Jul 2021

Bachelor of Engineering (B.E.) - CGPA 8.53

Anand, Gujarat

XII (SENIOR SECONDARY) DHOLAKIYA SCHOOL

Jul 2015 - Mar 2017

Science - 94.76PR

Rajkot, Gujarat

X (SECONDARY) DHOLAKIYA SCHOOL

Jun 2014 - Apr 2015

99.96PR

Rajkot, Gujarat

Technical Skills

Languages: HTML, CSS, JavaScript, TypeScript, SQL

Tools: Git, npm, Postman, Jenkins, Figma, Adobe-XD, Zeplin

Technologies/Frameworks: React.JS, Next.JS, Redux, Tanstack, Bootstrap, Sass, Material UI, Ant Design, Framer Motion, Micro-Frontend, Progressive Web Application (PWA)

Projects

IOT BASED ACCIDENT PRONE DEVICE

- In situations where accidents occur in remote or less accessible areas, prompt response can be hindered. To tackle this challenge, our team designed an IoT-based device.
- When an accident occurs, it automatically triggers a message containing the live location, sending it to the nearest emergency service and the individual's designated relatives or contacts.

HEALTH CARD

- Developed a web portal for streamlined health card generation and secure medical records access. Implemented a robust login system for healthcare professionals, enhancing the quality of patient care.

Achievements

- Selected as **Microsoft Student Partner(MSP)** on January 2020.
- Winner**, SARTHACK-19 Hackathon organized by AIC SURAT iLAB.
- Runner's up** of Smart India Hackathon 2020 Software Edition (**0.5 Million** Students Participants).
- Selected as a Finalist in SSIP's 2018 GIH Hackathon.
